

Dear Friend,

Water Missions International is preparing up to 36 water purification systems to aid survivors of the deadly cyclone that devastated Myanmar on Saturday, May 3. The latest reports claim that more than 22,000 lives have been lost and another 41,000 people are still missing. Hundreds of thousands of people are now homeless and in desperate need of shelter, food and most of all, clean drinking water. This is the worst disaster to strike Southeast Asia since the Tsunami of 2004, and your help is needed today.

Your gift will enable us to provide access to clean drinking water and the "Living Water" to the people of Myanmar. Please act now. Visit [www.watermissions.org](http://www.watermissions.org) to donate.

"To thwart off the spread of disease and death among these disaster victims, it is vital that clean drinking water is provided as soon as possible. To save lives, Water Missions International must act quickly with sustainable safe water systems, and to do so, we need immediate funding," explains WMI's VP of Development, Danya Jordan.

The need is tremendous. Please respond today at [www.watermissions.org](http://www.watermissions.org) with your heartfelt prayers and support. Thank you and God bless you.

Blessings,

Lindsay M. Wine, WMI Communications Specialist
